# Draw a comic strip!

## Step 1: Pick a character.

You can flip through a newspaper or magazine, use your own photographs, or simply print pictures from the internet.

## Step 2: Draw your figure.

Take a thin white paper and place it over your picture. Go to a window and use the light that shines through. Now you can easily trace your figure.

Tip: A few lines are enough to recognize your figure!

## Step 3: Give your character a conversation partner.

Do the same with a second character or draw more pictures of your first character.

#### Step 4: Let your characters speak.

Draw speech bubbles and let your character/s speak.

#### Step 5: Coloring.

If you like, you can add some colour to your figure/s or think about what is going on in the background of your figure/s.

Have fun!
